

WOOD AND STONE,
EFFECTIVE DURABLE
PRODUCTS FOR
CLEANING, PROTECTING
AND MAINTAINING
EVERYTHING
IN AND AROUND ALL
BUILDINGS

Highest Quality Products

CCC Limited (Conservation Chemicals Consultants) has been making advanced chemical products for all types of buildings and surfaces since 1987.

We develop and manufacture these products in our factory in the north of England.

We use the highest performance raw materials obtainable worldwide to make the most effective long lasting products for treatments of all building surfaces indoors and out.

These products differ from the usual because they are designed to penetrate deeply into and saturate the material, protecting from the inside, not just on the surface.

These products are versatile in use so “its what you want them for” and “how you use them”

Projects

Various Projects Using TimberTect and CeeTect

TimberTect (All Wood types)

Overview

We use the highest performance raw materials obtainable worldwide to make the most effective long lasting wood sealers for all building surfaces indoors and out.

These products differ from the usual because they are designed to penetrate deeply into and saturate the material, protecting from the inside, not just on the surface.

Products

Internal/External – Matt – Mid-Sheen – Gloss.

Work Top Seal - Finishing seal for worktops, tabletops, bath surrounds and any other surface exposed to food preparation, bathing and showering.

Our products can be applied to - Floors – Walls – Furniture – Bathrooms – Kitchens – Decking – Fencing, if it's made of wood then we have a product that will work. Our external range has UV protection added and is unique as the product has flexible technology that moves with the wood across the seasons

CeeTect (All Stone types in slate, tile etc)

Overview

We use the highest performance raw materials obtainable worldwide to make the most effective long lasting Stone sealers for all building surfaces indoors and out.

These products differ from the usual because they are designed to penetrate deeply into and saturate the material, protecting from the inside, not just on the surface.

Products

Internal/External – Matt – Mid-Sheen – Gloss.

Work Top Seal - Finishing seal for worktops, tabletops, bath surrounds and any other surface exposed to food preparation, bathing and showering.

Our products can be applied to - Floors – Walls – Furniture – Bathrooms – Kitchens – Decking – Fencing, if it's made of stone then we have a product that will work. Our external range has UV protection added

Preparation

Overview

It's not just about the end result with our sealants that is important it's also about the preparation and cleaning.

We have the highest quality preparation material available that we make in house and can makes your life so much easier

Products

Soakaway Plus - removes waxes, oils, some laquers, simple paints and much more. Safe for limestone & marble, use neat or dilute and environment safe

Intensive Cleaner - Professional standard alkaline cleaner easy to use, powerful but kind, safe for limestone & marble, use neat or dilute and safe for the environment

Preparation

Products

Sealant Remover - Powerful chemical remover of sealants, paints etc Safe to use on stone, wood, plaster and many other surfaces.

Mild Acid Cleaner - removes limescale safely easy to use, leaves no toxic residues safe for rough textured slate, and limestone safe for the environment

Products

Cotton Cloths - For Wiping & Polishing with Triple-C Sealants Grade 'A' Wiping/Polishing Cloth 100% Bleached Cotton.

Applicators - This Triple-C Sponge Applicator Kit has been designed & tested for the efficient and economic application of all Triple-C sealants. An appropriate quantity of sealant can be applied with a single stroke of the applicator pad. The pad can be cut to size as required., and cleaned and re-used.

Swift Seal and Swift Seal Ultra

Overview

Swift seal is an easily applied treatment for most porous surfaces – from low porosity stone to highly porous wood and concrete. It provides effective stain and spillage resistance without altering the tone or texture of the surface to which it is applied. It is fast drying and will resist normal cleaning and everyday wear and tear.

Products

SwiftSeal - Good protection from water, food & dirt. Almost invisible finish, with no surface coating Easy application & maintenance

Swift Seal Ultra - Amazing water repellancy, Good protection from water, food & dirt and oils. Almost invisible finish, with no surface coating Easy application & maintenance

Swift Seal Aqua – Water borne version

New water bourn sealers

Overview

AquaPlus/2 is a high performance, flexible, water borne aliphatic urethane ultra fine particle size resinous sealant and coating for the impregnation and sealing of medium to high porosity stone and similar substrates for use on walls, floors and other structures of stone and synthetic mineral (eg cement) materials, including ceramic and porcelain tiles, to provide reinforcement, protection, care and enhancement of such structures: some timber surfaces may also be treated with the product, subject to testing for compatibility

Products

Internal and External

AquaPlus - Provides a durable water-borne sealant and coating for porous mineral surfaces with only slight colour enhancement. Virtually odourless in use, no lingering odours when fully cured. Very fast initial drying, rapid full cure

AquaPlus2 - Performance approaching that of solvent-borne urethane sealers and coatings, with odourless working conditions.
